#### **DETAILED ACTION**

1. The Amendment filed December 7, 2004 has been entered. Claims 1-15 remain pending in the application.

### Claim Rejections - 35 USC § 102

- 2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 3. Claims 1, 5,11,13, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Levinson (US 4390554) as evidenced by Waddell (US 6464104 B1)
- 4. See rejection (i) in the Office Action Mailed September 7,2004.
- 5. Currently amended claims 1 and 15 further recite the "packaging assembly is used in automatic dispensing machines equipped with microwave ovens." This is an intended use limitation, and if Levinson is capable of performing the intended use, then it meets the claim. Levinson teaches a frozen package assembly that is capable of commercial and vending feeding (Column 2, lines 42-47), and Waddell is relied on as evidence that a frozen package assembly *is* capable of being used with automatic dispensing vending machines equipped with microwave ovens (Abstract, Column 2, line 44 to Column 3, line 15).
- 6. Claims 1, 5, and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Levinson (US 4390554), as evidenced by Waddell (US 6464104 B1).

Art Unit: 1761

7. See rejection (ii) in the Office Action Mailed September 7,2004.

8. Currently amended claims 1 and 15 further recite the "packaging assembly is used in automatic dispensing machines equipped with microwave ovens." This is an intended use limitation, and if Levinson is capable of performing the intended use, then it meets the claim. Levinson teaches a frozen package assembly that is capable of commercial and vending feeding (Column 2, lines 42-47), and Waddell is relied on as evidence that a frozen package assembly *is* capable of being used with automatic dispensing vending machines equipped with microwave ovens (Abstract, Column 2, line 44 to Column 3, line 15).

## Claim Rejections - 35 USC § 103

- 9. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 10. Claims 3 and 14 are rejected under 35 U.S.C. 103(a) as being over unpatentable Levinson (US 4390554) as evidenced by Waddell (US 6464104 B1), as applied to claims 1,5,11,13, and 15 in rejection (i), further in view of Cox (US 5679278).
- 11. See the Office Action mailed September 7, 2004.
- 12. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Levinson (US 4390554) as evidenced by Waddell (US 6464104 B1), as applied to claims 1,5,11,13, and 15 in rejection (i), further in view of Smart et al. (US 4890439).
- 13. See the Office Action mailed September 7, 2004.

Art Unit: 1761

14. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Levinson (US 4390554) as evidenced by Waddell (US 6464104 B1), as applied to claims 1,5,11,13, and 15 in rejection (i), further in view of Borek (US 4219573).

- 15. See the Office Action mailed September 7, 2004.
- 16. Claims 2,7,10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Levinson (US 4390554) as evidenced by Waddell (US 6464104 B1), as applied to claims 1,5, and 13 in rejection (ii), further in view of Borek (US 4219573).
- 17. See the Office Action mailed September 7, 2004.
- 18. Claims 1,4-6,12,13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Engstrom et al. (US 4734288) in view of Anderson (US 4950859).
- 19. See the Office Action mailed September 7, 2004.

## Response to Arguments

- 20. Applicant's arguments filed December 7, 2004 have been fully considered but they are not persuasive.
- 21. With respect to the rejection of claims under 35 USC 102(b) and 35 USC 103(a) and Levinson, Applicant argues that Levinson does not teach the new limitation "packaging assembly is used in automatic dispensing machines equipped with microwave ovens" of currently amended claims 1 and 15 and that a frozen food

Application/Control Number: 09/829,219

Art Unit: 1761

package is not suitable with automatic dispensing machines. However, as discussed above in the rejections under 35 USC 102(b), Levinson does teach the product is suit for commercial or *vending* feeding, and Waddell does teach frozen food packages are suitable with automatic dispensing machines equipped with microwave ovens.

Furthermore, Applicant is reminded that a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 370 F.2d 576, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 312 F.2d 937, 939, 136 USPQ 458, 459 (CCPA 1963). In the instant case, it has been shown that frozen food packages are suitable for automatic dispensing machines equipped with microwave ovens.

Page 5

22. Applicant also argues that Levinson does teach a package not suitable for use with a food product such as popcorn because of the perforated film, and popcorn requires the humidity and organoleptic qualities be preserved until it is heated However, it is noted that the features upon which applicant relies (i.e., a food product such as popcorn or a non-perforated film) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Art Unit: 1761

23. With respect to the rejection of claims 1,4-6, 12,13 under 35 USC 103(a) as being unpatentable over Engstrom et al. in view of Anderson, Applicant argues that Engstrom et al. do not teach an outer package which is melted during its heating and that Anderson does not teach a heat-concentrating material which melts any portion of a microwave package. The Examiner stated in Paragraph 24 in the Office Action mailed September 7,2004 that Engstrom et al. teach an inner plastic popcorn wrapper (item 29) and an outer package of plastic material. The Examiner stated that the polyethylene layer (i.e. item 22), which is a solid at room temperature, melts during the heating process, and completely surrounds the inner wrapper, was considered the outer package. This outer package is covered on its outer surface by a paperboard-based substrate(See Column 5, line 37 to Column 6, line 14). Anderson is relied on for teaching including heat-concentrating material inside a plastic popcorn bag (i.e. in contact with the popcorn) to increase cooking efficiency, and thus provides motivation for including a heat concentrating material inside the inner popcorn wrapper of Engstrom et al.: improve the microwave heating efficiency of popcorn in a plastic package.

#### Conclusion

- 24. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
- 25. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Application/Control Number: 09/829,219

Art Unit: 1761

TWO MONTHS of the mailing date of this final action and the advisory action is not

Page 7

mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later

than SIX MONTHS from the mailing date of this final action.

26. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Robert Madsen whose telephone number is (571) 272-

1402. The examiner can normally be reached on 7:00AM-3:30PM M-F.

27. If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Milton Cano can be reached on (571) 272-1398. The fax phone number for

the organization where this application or proceeding is assigned is 703-872-9306.

28. Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
